As in the first edition, the author has done a magnificent job compiling these instruments and providing important information that the reader can use to evaluate their usefulness."

--Ora Lea Strickland, RN, PhD, FAAN (From the Foreword)

This book provides all the essential research tools for assessing and measuring caring for those in the caring professions. Watson's text is the only comprehensive and accessible collection of instruments for care measurement in clinical and educational nursing research. The measurements address quality of care, patient, client, and nurse perceptions of caring, and caring behaviors, abilities, and efficacy.

Newly updated, this edition also contains three new chapters, which document the most effective caring language and provide innovative methods of selecting appropriate tools for measurement based on validity and reliability.

Key features of new edition:

- A chapter providing a comprehensive literature review of the research and measurement of caring
- A chapter entitled "Caring Factor Survey," which presents a new scale based on Watson's original theory of human caring
- Chapters outlining instruments for care measurement, including Holistic Caring Inventory, Peer Group Caring Interaction Scale, and many more
- New instruments focused on assessing caring at the administrative-relational caring level
- An updated section dedicated to challenges and future directions of the measurement of caring

- Sales Rank: #1175065 in Books

Caring Assessment Tool Book

By Sandra G. Nadelson

Dr. Watson is truly the expert on nursing caring and did excellent work in revising this assessment tool book. The information included is better organized and deeper than the first book edition. Plus, an added feature is the contact information of the tool creators.

If you are looking for a deep philosophical explanation of what caring is and in depth information on the theoretical basis for assessment of caring, this book probably isn't for you. However, if you are a researcher and want to know what tools are available, know about their reliability and validity, plus see what they look like, this is your book.

Great Book for Nursing Faculty

By ss

We should never forget what nurses are all about...caring. It is difficult to assess the nursing student's skill in the affective domain, but this well written book explains how to assess and measure caring. I recommend it to nursing faculty.
