### WORTH EVERY PENNY

By Tabetha Esposito

I have used this entire series for years... I buy all levels 1-5 to be able to address all ability levels. The new CC format is great and I like that they got rid of the black bottom border for copying purposes! I send it home Wednesday and it is due next Wednesday. It is additional support homework. (I have also used it as bellwork as small groups arrive at my instructional table to give me 1 minute to "put out fires")

my daughter loves this workbook

By Eva Wilson

One of my friends recommended this book to us. This 96-page comprehensive supplement contains standards-aligned reproducible activities designed to focus on critical math skills and concepts. Each page includes 16 problems to be completed during a four-day period. An assessment for the fifth day is provided for evaluating children' understanding of the math concepts practiced throughout the week. The practice in this book is divided to 40 weeks. What my daughter loves most about this book is she only needs 10 minuets a day to finish the practice and she can do math practice all year long! Of course she also loves the alignment matrix and the answer key for assessment and easy progress monitoring. She's already seeing how the techniques help her in her normal math work. She is now probably the top math student in her class. In the Beestar online math tests (a nice web site beestar.org), she is ranked high in the honor roll. I'm very pleased with this book. It makes math fun to my daughter.

Common Core Practice

By Cathy R--Amazon Customer

I would recommend this product to use with 5th graders. It is a quick skills practice that can be used every day and also has a weekly assessment which will let a teacher know if the students are getting the concept being taught.
