Juts find it here by downloading the soft documents Richard Meier: Houses 1962/1997 By Richard Meier, Paul Goldberger in web link web page.

Amazon.com Review

Richard Meier is one of the most renowned architects working today. His works are characterized by their rationalism, their rather detached purity, and their large expanses of reticulated forms masterfully articulating voids and solids. An architect obsessed with visual effects, Meier is known for such large-scale projects as the Getty Center in Los Angeles. This oversize book, however, concentrates solely on Meier's residential works. Fourteen houses are featured through dramatic color photos of both interior and exterior side by side with drawings, plans, and reflections of both the architect and his clients. A bibliography and a chronology of all of Meier's residential projects, both built and unbuilt, complete this visually stunning volume.

Magnificent Whiteness

By Shannon Deason

I must confess I love Richard Meier's work. His structures are so clean and modern, I love the use of glass and light. Honestly, if I were fabulously wealthy he would be the first person I called to build my house, and I would pay him anything. Nobody designs a house like Mr. Meier and this book does a grand job of illustrating that point. The photographs are first rate and the colors are sharp. The latter is so important when doing a book on his work because the play of light on white is what his buildings are all about. All of his best houses before 97 are covered and they are all given the royal treatment. If you love clean crisp modern design then buy this wonderful book on this master architect's work, you won't be disappointed.
