You need to like to through this.

TOGAF VERSION 9.1 BY VAN HAREN PDF

TOGAF is a framework - a detailed method and a set of supporting tools - for developing an enterprise architecture, developed by members of The Open Group Architecture Forum. TOGAF Version 9.1 is a maintenance update to TOGAF 9, addressing comments raised since the introduction of TOGAF 9 in 2009. It retains the major features and structure of TOGAF 9, thereby preserving existing investment in TOGAF, and adds further detail and clarification to what is already proven. It may be used freely by any organization wishing to develop an enterprise architecture for use within that organization (subject to the Conditions of Use). This Book is divided into seven parts.

- Sales Rank: #398481 in Books

Great update of this open standard enterprise architecture method

By Joost

TOGAF 9 is the long awaited update to TOGAF 8. At almost 750 pages, it is not for the faint at heart. It is not the most entertaining read, but it still is the best documented enterprise architecture method publicly available. The book is of high quality binding and will endure browsing through the pages for a long time.

For this new version of TOGAF the method is both improved and extended. The method is restructured from 4 to 7 parts for better understandability. The description of several phases in the architecture development method (ADM) is highly improved. A completely new Architecture Content Framework with a proper Content Metamodel is added. Now, you can not only follow the process guidelines, you can also read how to model the deliverables and artifacts that need to be created. I think that 40% of the pages contains new material.

Although the text of parts that were already present in TOGAF 8 is corrected and improved, the diagrams still have no legend. The meaning of the "boxes and arrows" differs from diagram to diagram and is never explained. The new text parts suffer from proper review. The text is very abstract and with little examples. It contains terminology and cross reference errors. The index almost never indexes all the uses of a term or concept. What bothers me most: new and seemingly important techniques like Capability-based Planning and Architecture Partitioning are insufficiently explained. And artifacts and viewpoints are very loosely described and the book contains no examples of the proposed diagrams.

Concluding, TOGAF 9 can help you to become a better (enterprise) architect, but it is not enough. And it is in need of a 9.01 revision.

Again, I am never disappointed with books by Van haren Publishing

By H. Lee

I have worked as a Systems Architect for many years and was exposed to TOGAF while working in Europe. Upon talking as new position in USA, I was surprised how in efficient the Systems Architecture group I joined is. management never heard of TOGAF, and this book was perfect to get all the Systems Architects (10+) familiar with this framework. Booked is very easy to follow for those unfamiliar with TOGAF.

Fonts Too small to read for long time

By Murali Manohar

+ : The content is very extensive and has abundant information on Enterprise Architecture. Its nicely structured and organized .

-: The fonts are too small and it gives much stress to eyes. Its better to read free online version <http://pubs.opengroup.org/architecture/togaf9-doc>.Hence rating with 3 star.
