Book was good and nicely put together

By bookworm

Book was good and nicely put together. Hope this does not come to fruition but the way the world is going looks like it could be tomorrow. These two authors have taken their time and researched the material which is something that is really nice. Accuracy is greatly appreciated!. When will book two becoming out...I cannot wait to see America strike back.

Highly recommend this book

By patti jane

This was a short but intense story. The more "end of days" books that I read, the more they become real. Unfortunately, most people refuse to consider this scenario and will be totally devastated when bad things start to unfold. God bless America and it's strongest ally Israel.

The Emperor Has No Clothes

By Thomas E. Bloom

Many books describing horrific attacks on the US by terrorists have been written since (and before) 9/11. They vary in quality from very good to pretty bad, this one is near the bottom. The seven 5 stars must come from 'true believers' who will up vote anything that sounds military, god-fearingly patriotic and has a prepper family inventorying their guns, ammo and food.

US president Zachary Space has noticed an irregularity (missed by everyone else) in a satellite view of Viet Nam that he remembers was different than when he was a soldier there "a life time ago". He orders the satellite to make constant observations for 72 hours. This is not possible, the satellite will continue in its orbit. Space admits to being a conspiracy theorist and suspects the object is MH370.

Intercepted emails show the 'gitmo 5' secretly meeting in Baghdad to plot "Jihad Day". People as closely followed as these guys couldn't secretly plan a surprise birthday party. Somehow they get a hold of 84 Russian suitcase nukes. America is "prime picking" for a terrorist attack because:

"The continuing unbalanced political quandary in this country has made it easy for the terrorist to pit each party against each other and silently add to the inner destruction. The ever present racially divided country has been brought down to lower levels by permitting, allowing atrocities to be continuously happened without these groups ever coming to a compromise. A compromise that would make these governing bodies stop and commit to some self-reflection".

What does this mean? I don't know. Anyway, Islamic doctors, lawyers etc are living in the US and training Jihadists. The authors list 6 examples of home grown terrorists (out of 300,000,000 Americans) including Ana Montes (spy for Cuba, born in Germany), and Bradley Manning, but not Timothy McVeigh!

The thinly drawn protagonists are off to visit their bug-out compound. It is surrounded by a 6' steel fence and 3 rows of razor wire and Claymore mines!

The spot in the mountains in Viet Nam is in fact MH370. Somehow, they built a mile of runway there and hauled up 200,000 pounds of jet fuel without attracting attention. It manages to reach Washington (far exceeding its range) with "nuclear weapons, chemical weapons and hundreds of pounds of explosives". What would a few hundred pounds of explosives add to the nukes?

Next comes a lecture on chemical and biological weapons lifted straight out of Wikipedia.

The rest of the book has the characters do human stuff for human interest, except it's not well written or interesting. They rescue an old man and his dog, who quotes bible verses about the end times.

No matter how much some people believe in this sort of fate for America, there are much better books to vote up, and nothing is gained by giving undeserved praise for any book this bad just because it has a desired message.
