How To Build A Beautiful Deck, Using Basic Carpentry Skills

Building a deck is the kind of woodworking project that can add hundreds, if not thousands of dollars onto the value of your home. If that is, the job is done right - and that does not mean you have to be a mega-skilled carpenter! Even with the most basic do it yourself skills, building a fantastic looking deck area is well within the realms of possibility.

Home Repair & Improvement:

In this book 'How To Build A Deck', the author gives examples and pictures of decking projects that he has personally done, and one case in particular that added over \$24,000 to the house value. However building a deck is not all about monetary value alone; there is the value that it adds with regard to your social life, as well as just how much it can transform the appearance of your property, especially when it is a part of an overall home repair or home improvement plan, perhaps incorporating a general upgrading of your outdoor recreational areas.

Creating a Great Recreation Area Is Not Difficult

For anyone with basic DIY skills then building a decking area around your house is very do-able. But even failing that, it pays to know just exactly what you want before employing the services of a carpenter to do it for you. With pictures all the way throughout, this book has great examples covering multiple different decking jobs.

This is a book that will show you how decking can be done in such a way as not to break the budget, and give you a result that you can be proud off for years to come.

No Help

By S. Haave

This book is small, kind of like a free pamphlet. But it wasn't free, should have been, it is that useful.

Get the Black and Decker book, just what a guy needs to build decks.
